Presentations Alive!™

15-year BESTSELLING Workshop!
An important component in the Learning & Development curriculum of leading MNCs in the region!

LOSE THEIR INTEREST, LOSE YOUR OPPORTUNITY!

- Don't look forward to presenting?
- Listeners pull out their iPhones or look at Blackberries by your third slide?

From too many to very fancy slides to not addressing the audience's concerns and needs - these are some mistakes that can easily derail your presentation.

The result?

For the audience - A boring, un-targeted, and sometimes even confusing presentation for the listener. For the presenter - Difficult questions and lots of clarification for the presenter. Worse still, lost opportunity.

Presentations Alive!™ addresses fundamental issues and provides professionals with the skill set needed to prepare and deliver effective presentations: from key messaging to complementing visual aids, non-verbal communication and handling nerves.

Participants learn this skill set in an intensive, energizing, and highly-interactive setting.

WHAT PARTICIPANTS LEARN

1. Organisation & Structure: develop logical, concise and effective content.
2. Dos & Don'ts of developing and presenting a presentation.
3. Non-Verbal Communication
4. Body Language: use of specific methods to increase calmness and confidence.

WHY PRESENTATIONS ALIVE!™?

This workshop uses Accelerated Learning and NLP principles to *transform* presentations and raise confidence in a *short* span of time.

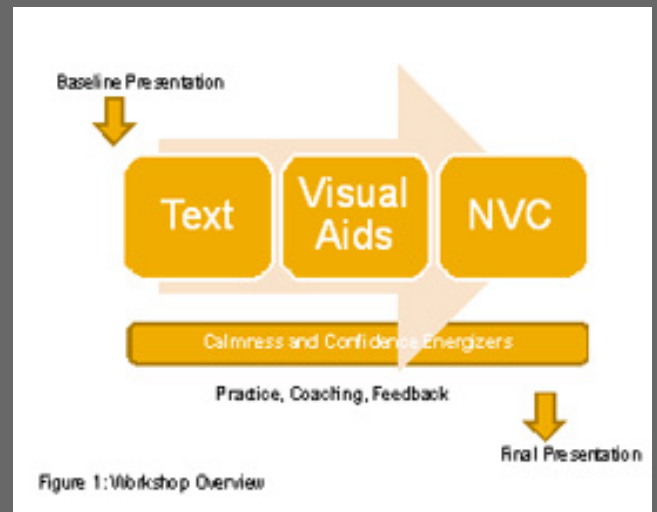

WHAT OUR CLIENTS SAY

"The programme is structured in a way that we learn and improve our presentation skill as well as enjoying ourselves. This is definitely the best training programme I have attended. Would strongly recommend that more staff be sent for this training."

"I can feel the difference before and after the training. I wish that I had this training when I was in college."

METHODOLOGY

1. Videotaping, view back and analysis of their baseline and final presentations.
2. Dozens of practice sessions including Trainer Demonstrations, Coaching and Feedback.
3. The Text Template take-away tool.
